

Are you pursuing a degree or certificate in GIS?

URISA: Fostering Excellence in GIS

Join today as a student member and start building your professional network today!

Enrolled students can become active **URISA** International Members for *only \$20 per year!*

Why join URISA?

"I became a member of URISA because it can really help expand your horizons in the GIScience field and expand your knowledge of the field as a whole. I joined because I knew that this organization could push me further, not only as a student, but as a professional. As a URISA member, I can expect to expand my knowledge through many opportunities, including conferences, competitions, and online webinars covering an array of areas."

-Austin Williams
GIS Student, Western Kentucky University

"From grad school student to CEO, URISA has been an important network and sounding board all along the way. URISA has provided educational and real world experience best practices that I have learned from and leveraged throughout my career."

-Allen Ibaugh
CEO, DTS GIS and Former Student Member

"If it weren't for URISA offering discounted student rates, I wouldn't have been able to attend a conference. Being able to present my work at GIS-Pro was a great experience. Seeing and discussing new technologies used by URISA members gave me a solid idea of what is becoming popular, what I should learn on my own, and what employers are looking for."

-Joe Tricarico
Former Student Member and Competition Winner

What you currently pay \$20 for...

- Four lattes, or
- One large pizza with everything, or
- Movie/video game rental subscription

What can \$20 with URISA get you? A full year as a URISA International Student Member...
