

Volume 10, Number 1, Spring 1998

Journal of the Urban and Regional Information Systems Association

URBAN AND REGIONAL
INFORMATION
SYSTEMS
ASSOCIATION

From the Editors

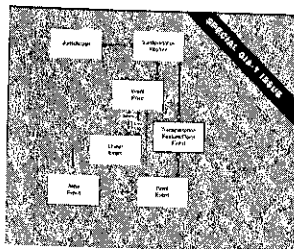

- 5 Mapping the Journal's Future
Kenneth J. Dueker, D. David Moyer and Bernard J. Niemann Jr.

Refereed

- 7 The Case for a Unified Linear Reference System
David Fletcher, John Espinoza, R. D. Mackoy, Steve Gordon, Bruce Spear, Alan Vonderohe
- 12 GIS-T Enterprise Data Model with Suggested Implementation Choices
Kenneth J. Dueker and J. Allison Butler
- 37 Analysis and Adjustment of Measurement Systems for Linear Referencing
Alan P. Vonderohe and Todd D. Hepworth
- 48 A Methodology for Design of Measurement Systems for Linear Referencing
Alan P. Vonderohe and Todd D. Hepworth

Review of Current Journal Literature

- 57 *Compiled by Zorica Nedović-Budić*

On the Cover

A Transportation Feature is a return to a more global entity than a Transportation Segment or Link, wherein attributes are referenced by a linear measure. This entity-relationship diagram reflects a paradigm shift in GIS-T to foster data exchange standards.
